NO. OF ENCLS. (LISTED BELOW)

25X1A

SUPPLEMENT TO REPORT NO.

25X1X

- The unserviceable parts of the destroyed bridge across the Hohenzollern Canal north of Kreuzbruch (N 53/2 88) were being removed in late November 1950.
- 2. Vehicular traffic across the canal in the course of the Liebenwalde (N 53/Z 79) - Zehlendorf (N 53/Z 74) highway is bein; maintained by ferry. Bridge equipment and construction materials were shipped to the site in early December 1950. This indicates that it is intended to reconstruct the bridge soon. A pile-driver raft has been built; the drop harmer is said to weigh 38 hundredweights. Sheet piles were not seen, but only a number of square and pointed concrete piles about 15 meters long and 30 cm in diameter. These piles were being driven in. * 25X1A

Comment. This bridge was reported on previously. See Although the structure is located on a second class road, its reconstruction has been included in the Land Brandenburg construction program for 1951 at an estimated cost of 80,000 eastmarks, See
